Forward-Looking Statements

This presentation includes forward-looking statements. These forward-looking statements can be identified by the use of forward-looking terminology, including the terms as “believe”, “expect”, “anticipate”, “may”, “assume”, “plan”, “intend”, “will”, “should”, “estimate”, “risk” and or, in each case, their negative, or other variations or comparable terminology. These forward-looking statements include all matters that are not historical facts and include statements regarding the Company’s intentions, beliefs or current expectations concerning, among other things, Vallourec’s results of operations, financial condition, liquidity, prospects, growth, strategies and the industries in which they operate. Readers are cautioned that forward-looking statements are not guarantees of future performance and that Vallourec’s or any of its affiliates’ actual results of operations, financial condition and liquidity, and the development of the industries in which they operate may differ materially from those made in or suggested by the forward-looking statements contained in this presentation. In addition, even if Vallourec’s or any of its affiliates’ results of operations, financial condition and liquidity, and the development of the industries in which they operate are consistent with the forward-looking statements contained in this presentation, those results or developments may not be indicative of results or developments in subsequent periods. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These risks include those developed or identified in the public documents filed by Vallourec with the French Financial Markets Authority (Autorité des marchés financiers, or “AMF”), including those listed in the “Risk Factors” section of the Registration Document filed with the AMF on March 14, 2024, under filing number n° D. 24-0113.

Accordingly, readers of this document are cautioned against relying on these forward-looking statements. These forward-looking statements are made as of the date of this document. Vallourec disclaims any intention or obligation to complete, update or revise these forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable laws and regulations. This presentation does not constitute any offer to purchase or exchange, nor any solicitation of an offer to sell or exchange securities of Vallourec. For further information, please refer to the website www.vallourec.com.

Information

Quarterly statements are unaudited and not subject to any review. Audit procedures have been carried out for the full year consolidated financial statements.

Unless otherwise specified, indicated variations are expressed in comparison with the same period of the previous year.

1

Investment Overview

The Vallourec Investment Case

Vallourec is a mission-critical supplier of complex steel tubular solutions supported by industry-leading R&D and world-class production facilities.

We are making Vallourec more profitable, more resilient and more cash-generative while delivering on our ambitious ESG targets.

We see multi-year tailwinds across Oil & Gas and New Energies markets that will drive robust demand for our products and services.

We aspire to be one of the most shareholder-friendly companies within our peer group, with cash distribution starting in 2025 at the latest.

Financial Figures

Zero Net Debt

by year-end 2025 at the latest

€850m

Midcycle EBITDA

€450m

Midcycle total cash generation

Aspiration to return

80% – 100%

of total cash generation to shareholders

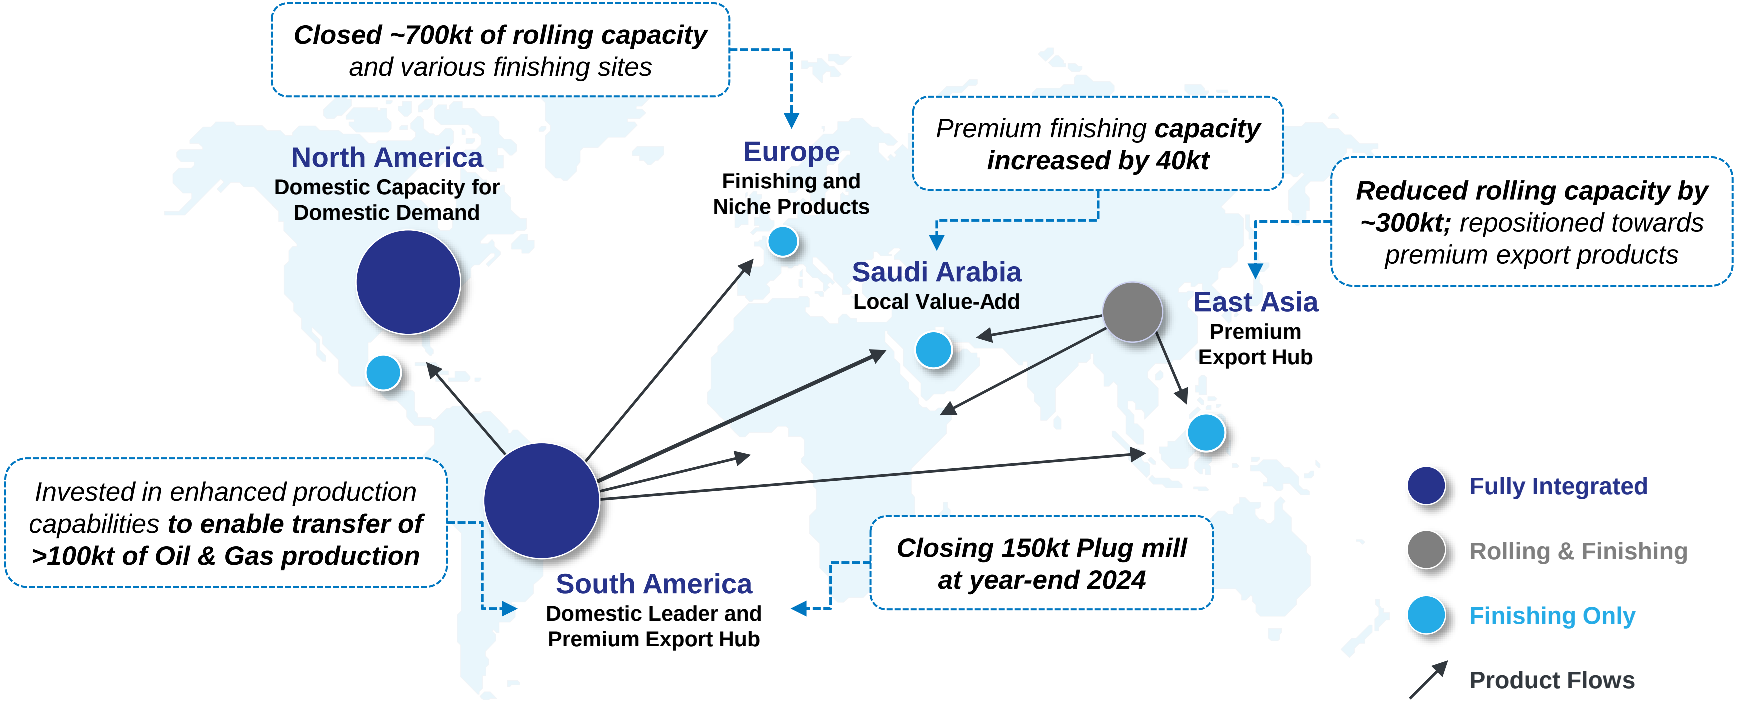
Notes: Vallourec's dividend policy would in any event be conditional upon the Board's decision taking into account Vallourec's results, its financial position including the deleveraging target and the potential restrictions applicable to the payment of dividends. Dividends and share repurchases would also be subject to shareholders approval. The midcycle simulation shown in this presentation does NOT represent guidance, forecast, target or outlook of Vallourec for any particular financial year, but aims to represent an abstract average across cycles and across different circumstances to illustrate, in a volatile and unpredictable environment, the theoretical functioning of the New Vallourec.

Vallourec’s Strategic Journey

More Profitable, More Resilient, More Cash Generative

Significantly Reshaped Production Footprint

Changes resulting from the New Vallourec plan and subsequent Brazil optimization



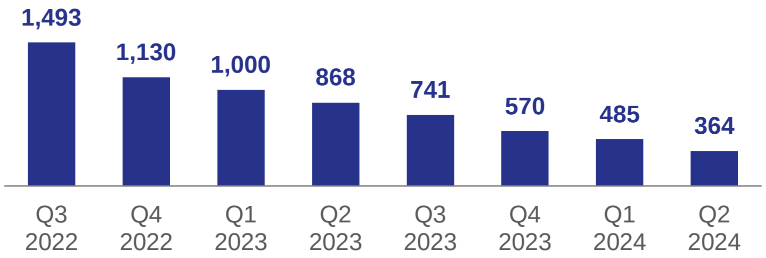
Note: Product flow arrows represent finished product sales, but do not account for intermediate flows to local finishing capacity. Aulnoye Forge not included as "rolling & finishing" in diagram.

vallourec

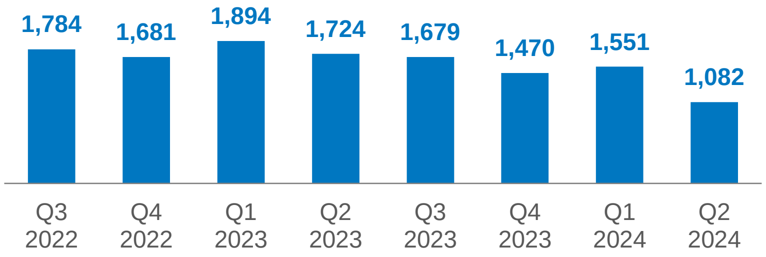
Strong Liquidity and Reduced Debt Following Refinancing

Debt

Net Debt (€ Million)

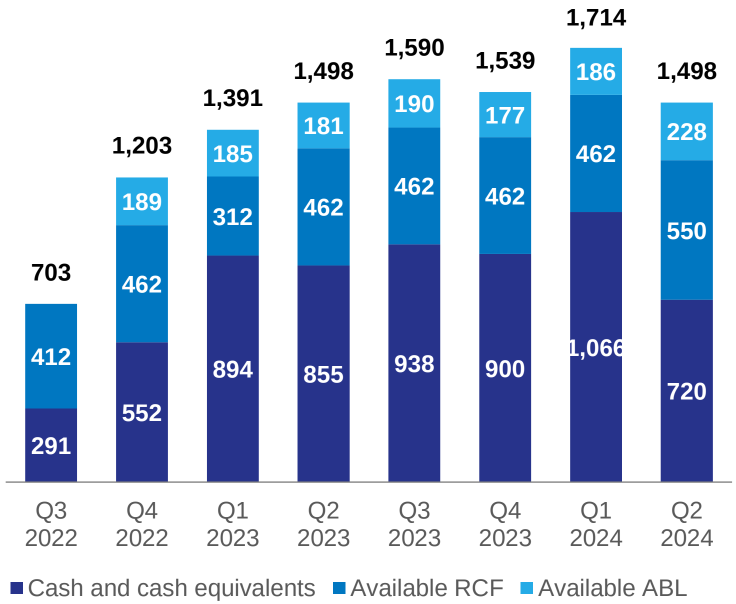


Gross Debt (€ Million)



Liquidity

€ Million



Our Capital Allocation Framework

Overarching Philosophy and Milestones

Metric	Objective	Application
Target Leverage	Zero net debt +/- 0.5x net debt / EBITDA	• Net debt below €400m is now well within long-term sustainable range • Must stay within leverage range after shareholder return
Payout Ratio	80 – 100% of total cash generation	• Includes all sources and uses of cash • Payout ratio highest when leverage is lowest
Timing of Shareholder Returns	To begin in 2025 at the latest	• First potential dividend to be proposed for AGM in 2025 • Possible share / warrant repurchases prior to AGM in 2025

Vallourec's dividend policy would in any event be conditional upon the Board's decision taking into account Vallourec's results, its financial position including the deleveraging target and the potential restrictions applicable to the payment of dividends. Dividends and share repurchases would also be subject to shareholders' approval

2

Brazil Performance Program

Progressing Brazil Tubes Operations to Best-in-Class

Key accomplishments and further initiatives

Accomplishments in 2022 – 2023

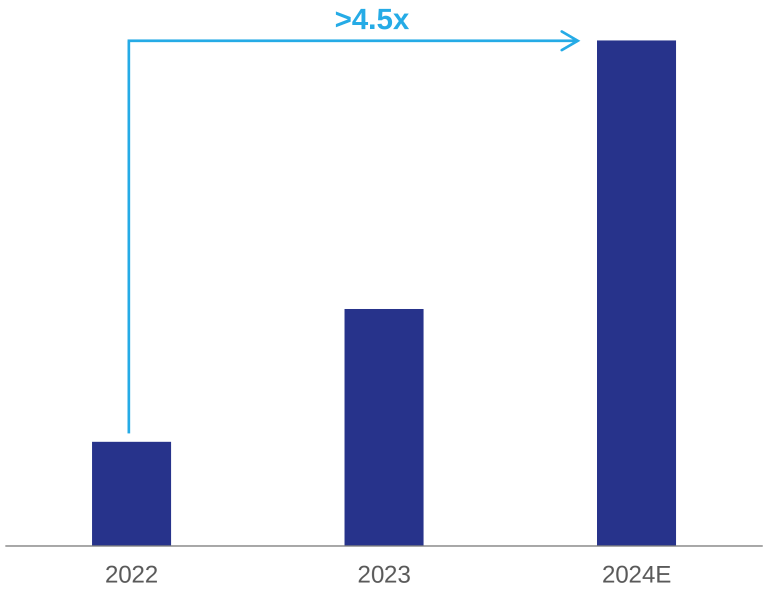
- ✓ Redesigned organizational structure
- ✓ Executed major capex program as planned
- ✓ Delivered improved Tubes EBITDA

Initiatives for 2024 – 2025

- Rationalization of production footprint
- Further reduction of complexity and operating costs
- Creating platform for higher premium tube production

Substantial improvement so far, but more to come

Brazil Tubes EBITDA per Tonne



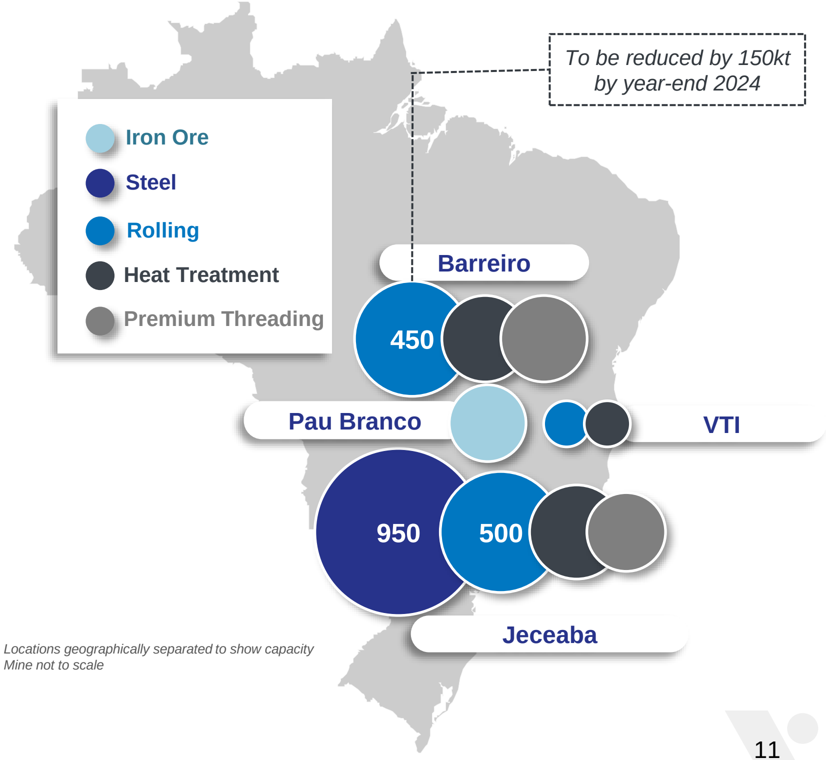
vallourec

Rationalization of Our Brazilian Production Footprint

Streamlining assets and retaining upside potential

- Optimizing our asset base
  - Jeceaba (500kt): state of the art, world-class rolling mill
  - Barreiro (450kt): two smaller, more-flexible rolling mills
    - **Plug mill (150kt) to be closed at year-end 2024**
    - Mandrel mill (300kt) to remain in operation
- Plug mill closure: Value over Volume in practice
  - Aging asset with rising reinvestment needs
  - Significant product overlap with Jeceaba
- Reduced costs and avoided capex
  - Outright cost reductions from lower staffing needs
  - Avoidance of future capex and maintenance cost
  - More-efficient production process
    - Plug processing cost per tonne substantially above Jeceaba cost
    - Better loading of remaining capacity

Tubes Production Capacity (Thousand Tonnes)



Locations geographically separated to show capacity
Mine not to scale

vallourec

Reducing Complexity and Operating Costs

Driving efficiency in our operations

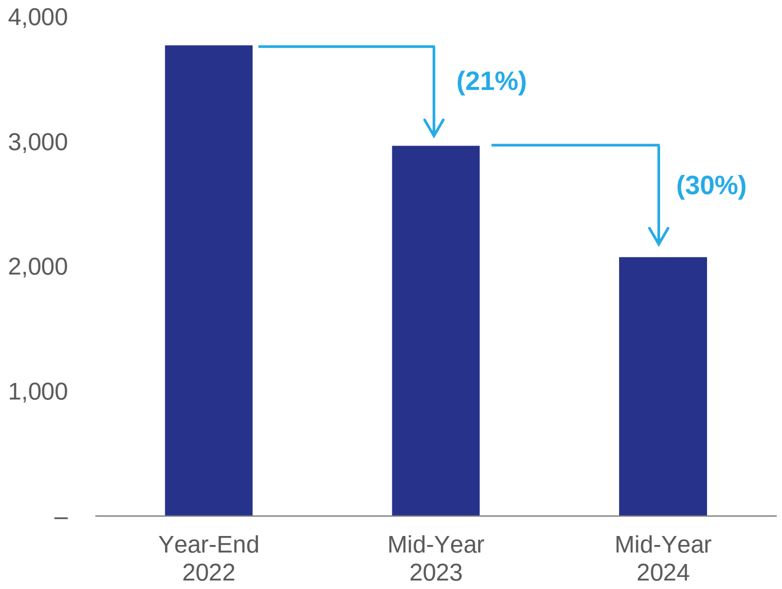
- Complexity reduction
  - Exiting low-margin Industry businesses where pricing does not reflect high value-add
  - Implementing strict minimum order quantity
  - Decreased Industry & Process SKUs by a further 30%
- Labor management
  - Increasing utilization of maintenance and direct production staff
  - Decreasing overall labor costs by 10-15%
- Other cost improvements
  - Renegotiating raw materials and freight contracts
  - Improving process yields and quality performance

Overall Target: >€150/tonne regional cost reduction[1] by year-end 2025

[1] Refers to cost per tonne of Brazil Tubes operations relative to 2023 baseline

Focusing product portfolio to enhance efficiency

Active Industry & Process Stock-Keeping Units (SKUs)



Creating the Platform for Profitable Future Growth

Capitalizing on Future Demand

- Strong demand pipeline in global premium OCTG and PLP export markets
- Significant progress in qualifying Brazil production route for core customer base
- Key production route for New Energies products
- Medium-term improvement in high-value segments of Industry and Process markets

Improving Production Efficiency

- Manufacturing process improvements underway with further upside to benchmark utilization
- Debottlenecking high-value equipment: ~15% increase in usable capacity already realized
- Improved use of global premium finishing capacity
- Further integration and optimization of sales and operational planning

Capable of >100kt in incremental volume from Brazilian production base[1]

[1] *Refers to shipments from Brazil relative to H1 2024 baseline*

3

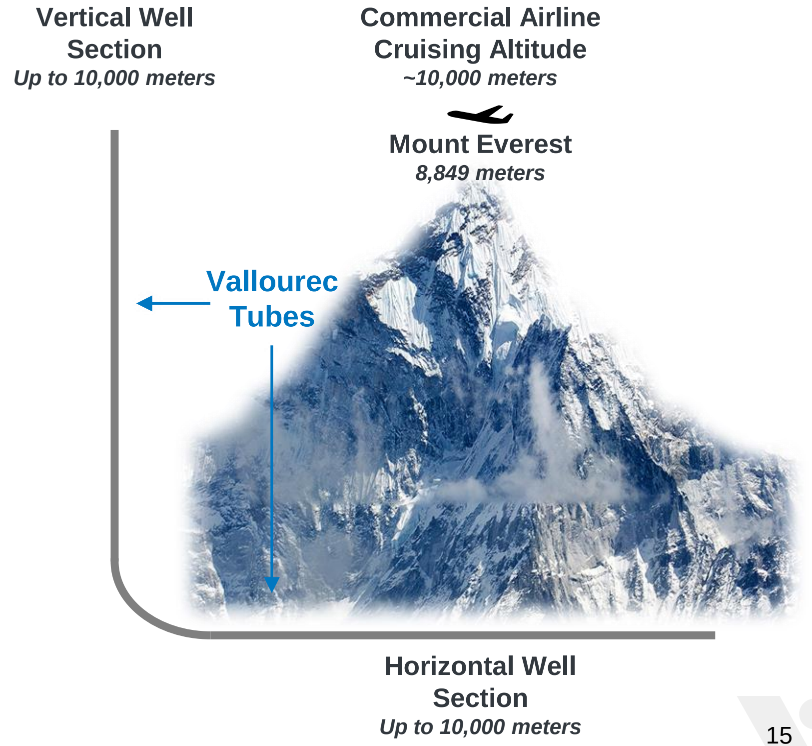
Operations & Financials

Supplier of Mission-Critical Premium Seamless Tubular Solutions

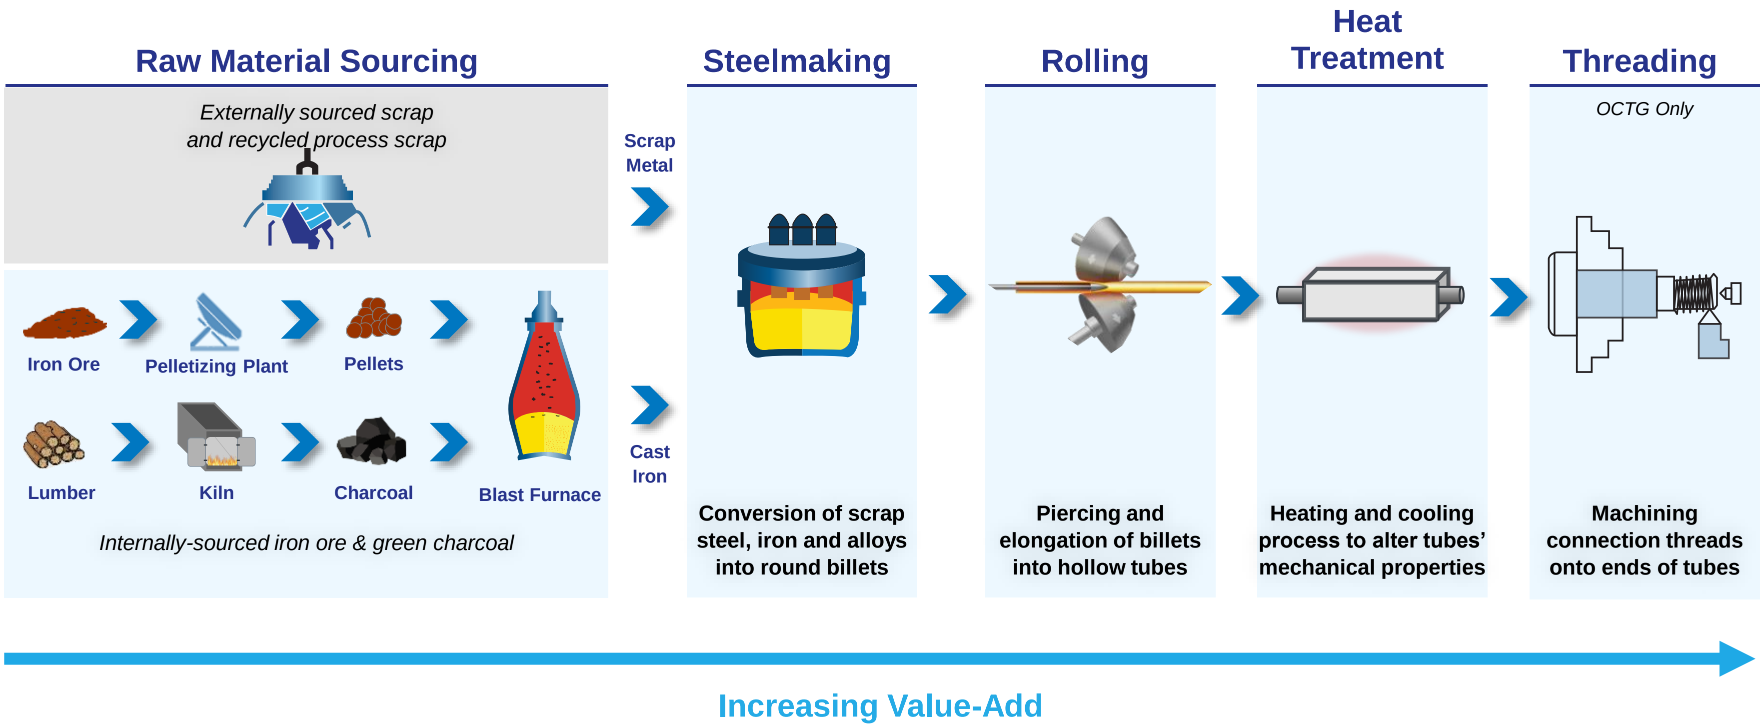
Focused on high-end seamless tubular solution

	Welded Tubes	Seamless Tubes (Vallourec Focus)
Product Summary	**Lower-end** products made by rolling flat steel into a tube and welding the seam	**Higher-end** products made by piercing and extending a round steel billet
Product Price and Complexity	**Lower-cost** product with simpler manufacturing process but insufficient performance in demanding applications	**Higher-cost** product with complex manufacturing process, ability to perform in demanding applications

Highly demanding applications for our products



The Seamless Tube Production Process



The Value of R&D: New Solutions and New Markets

Oil & Gas Solutions

Steel Grades
- VM130 MS
- X80 HW for LP
- Extreme Collapse
- X65 HW for LP

Connections
- CLEANWELL® T&C
- VAM® SLIJ-3
- VAM® SPRINT SF-FJ
- VAM® SPRINT T&C
- CLEANWELL® Integrals
- Composite Tubing
- New Premium Connections

Services & Accessories
- Intelligent Drift
- In-Pipe Rovers (UT+ET)
- Pre-Installed Cable Protector
- Submagnetico FreeFlow®

New Growth Areas

New Products & Services
- Solar PV Structure
- WAAM
- VIT for Geo-thermal
- Delphy H_2 Storage
- Liner for CO_2 LP

Recently Commercialized → Future Opportunities

VAM® = Vallourec's premium connection brand
T&C = Threaded & Coupled connection
SF-FJ = Semi-Flush and Flush connections
HW = Heavy Wall
LP = Line Pipe

SS / MS = Sour Service / Mild Sour
WAAM = Wire Arc Additive Manufacturing
VIT = Vacuum Insulated Tubes
UT = Ultrasonic testing
ET = Eddy Current Testing

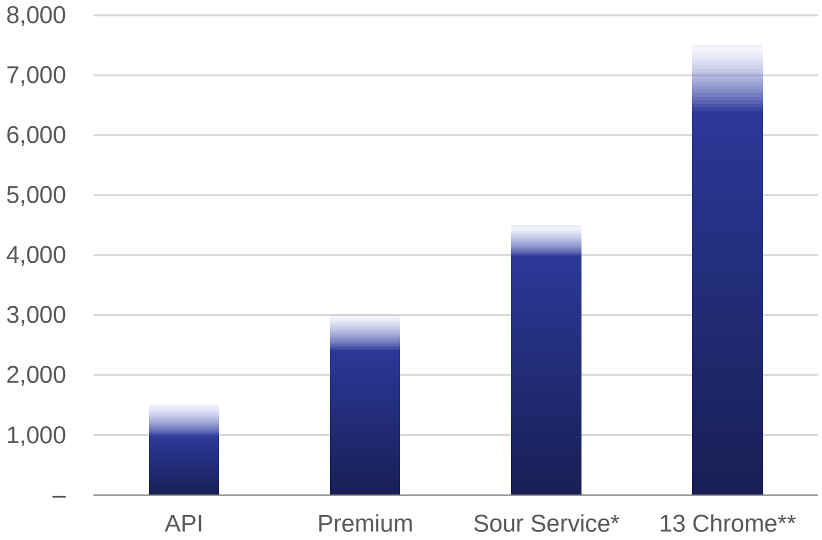
Technology Unlocks High-Value Markets

Gaining Access to Value-Added Markets

- Value over Volume strategy emphasizes participation in markets where we are well-positioned due to:
  - Technology
  - Geography or trade
  - Customer intimacy or service offering
- Technology is not static; it depends on an organizational culture of innovation
  - Customers and regulators demand ever-increasing safety
  - Ongoing customer focus on harder-to-exploit reservoirs like shale, ultra deepwater, and corrosive (sour) reservoirs
  - New challenges faced in New Energies value chain

Advanced Technology Drives Higher Added Value

Market Price ($ / tonne)



Source: Rystad Energy, Vallourec estimates
** Sour Service refers to O&G environments where hydrogen sulfide (H_2S) is present . H_2S is a poisonous and highly corrosive gas. Special carbon steel grades are needed to resist corrosion cracking in sour service.*
*** 13 Chrome refers to martensitic stainless steels containing 13% of chromium. These steels provide resistance to metal-loss corrosion during the life of the wells and enable to avoid costly work-overs.*

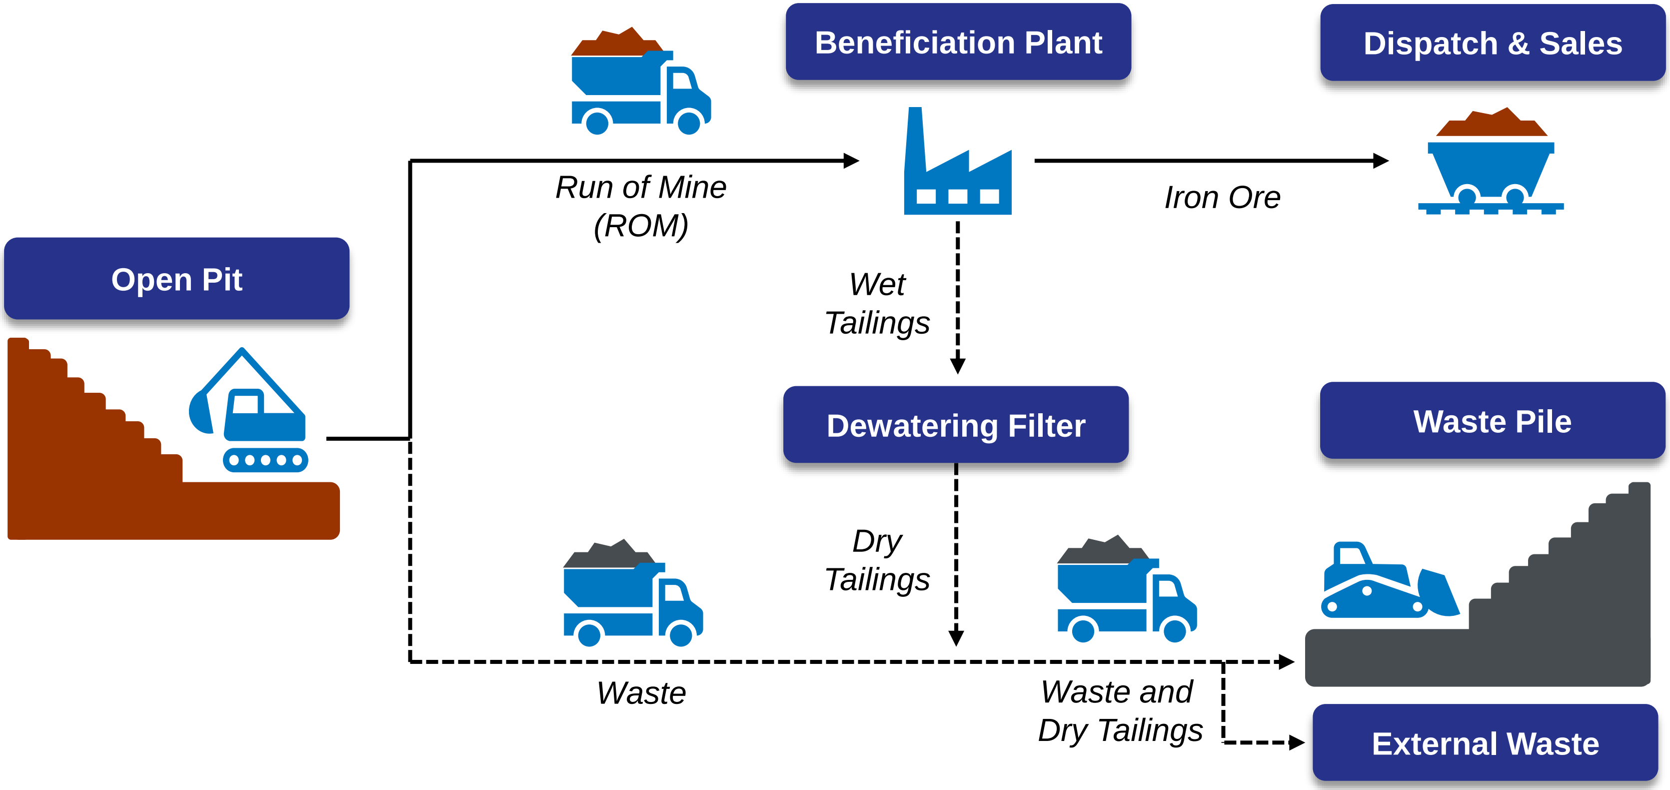
vallourec

Midcycle Tubes Earnings Power Simulation

Metric	Assumption	Comments
<u>**Operating Assumptions**</u>		
Total sales volumes (k tonnes)	**1,700**	**Maximizing premium mix as opposed to maximizing volumes**
Vallourec average selling price ($)	**$2,800- $3,000**	**Assumes market prices in the low-mid $2k per tonne range + Tier 1 premium**
USD / EUR	~1.10	
Vallourec average selling price (€)	€2,650	At midpoint of assumed pricing range
Total costs per tonne (€)	€2,200	Assumed to remain elevated versus history
EBITDA per tonne (€)	**€450**	
<u>**Simplified Tubes P&L**</u>		
Revenues	€4.5b	
EBITDA	**€750m**	
EBITDA % Margin	17%	

Notes: All per-tonne metrics rounded to nearest multiple of 50. Revenue is rounded to nearest €100 million, EBITDA to nearest €50 million increment. Total cost per tonne includes Cost of Sales and SG&A. The midcycle simulation shown in this presentation and related assumptions do NOT represent guidance, forecast, target or outlook of Vallourec for any particular financial year, but aim to represent an abstract average across cycles and across different circumstances to illustrate, in a volatile and unpredictable environment, the theoretical functioning of the New Vallourec. Average selling price defined as revenue divided by sales volumes.

The Mining Process



Mine Earnings Power and Growth Potential

Near-term operational targets

6.0m	New near-term[1] annual iron ore production target (m tonnes)
1.0m	Production used to support Tubes production business (m tonnes)
40% – 45%	Weighted average contractual selling prices as a percentage of Platt's iron ore index[2]
€20 – €25	Total cost of extraction, overhead, and SG&A per tonne
~€100m	Annualized EBITDA run-rate[3]

Two-phase extension plan in progress

	Phase 1	**Phase 2**
Incremental Annual Iron Ore Production[4]	–	+1mt – 2mt
Incremental Annual EBITDA[4]	+€20 – €25m	+€50m – €75m
Estimated Project Capex (€m)[5]	€20m	€100m – €125m
Expected Start-Up	Late 2024	2027

[1] 6 million tonne annual production target commences in 2024
[2] "Platt's iron ore index" refers to 62% Fe CFR China index
[3] Assuming Platts index around $110 per tonne
[4] Measured relative to near-term baseline metrics on left of page
[5] Capital expenditures for Phase 2 are still pending further project planning and evaluation. Actual project spending may vary versus current assumptions based on further cost evaluation

Midcycle Cash Flow Simulation: Significant Potential Returns

Metric	Assumption	Comments
EBITDA (€)		
Tubes	€750m	
Mine & Forest	€125m	
Holding & Other, Intersegment	(€25m)	
Group EBITDA	**€850m**	
Cash Flows (€)		
Capital expenditures	€175m	Including mine extensions, can reduce to ~€125m in downturn
Financial cash out	€50m	Assuming zero net debt, with costs for minimal gross debt and other items
Cash tax	€175m	High 20% range depending on blend of regional profits
Group total cash generation	**€450m**	
Aspired total cash generation payout ratio[1]	***80% – 100%***	***In line with highest ratios in the market***

[1] Vallourec's dividend policy would in any event be conditional upon the Board's decision taking into account Vallourec's results, its financial position including the deleveraging target and the potential restrictions applicable to the payment of dividends. Dividends and share repurchases would also be subject to shareholders approval. The midcycle simulation and related assumptions shown in this presentation do NOT represent guidance, forecast, target or outlook of Vallourec for any particular financial year, but aim to represent an abstract average across cycles and across different circumstances to illustrate, in a volatile and unpredictable environment, the theoretical functioning of the New Vallourec.

Analysis excludes changes in working capital, asset disposals and restructuring cash out. The midcycle simulation shown in this presentation does NOT represent guidance, forecast, target or outlook of Vallourec for any particular financial year, but aims to represent an abstract average across cycles and across different circumstances to illustrate, in a volatile and unpredictable environment, the theoretical functioning of the New Vallourec.

2024 Earnings, Cash Flow and Net Debt Outlook

	Third Quarter 2024	Full Year 2024
Tubes	Revenues to decrease sequentially due to lower US shipments and pricing as well as Q4-weighted international shipment schedule	Strong international market environment to persist, more than offset by lower US demand and pricing
Mine & Forest	Production sold to increase sequentially	Production sold to be approximately 6m tonnes; EBITDA to be approximately €100 million at current iron ore prices
Group EBITDA	Group EBITDA to decline versus Q2 due to lower Tubes volumes and reduced US Tubes pricing	Group EBITDA to range between €800 – €850 million
Total Cash Generation & Net Debt	Total cash generation to be positive and net debt to further decline versus the Q2 2024 level[1]	Second half total cash generation to be positive and net debt to further decline versus the Q2 2024 level[1]

[1] *In all cases, total cash generation and net debt guidance excludes the potential positive impact of major asset sales.*

Cash Flow Modeling Items for 2024

Mid-Year 2024 Update

	Prior View	Updated View
Financial cash out	Approximately €100m	Approximately €100m
Tax payments	Mid-to-high 20% cash tax rate relative to reported pre-tax income	Low-to-mid 20% cash tax rate relative to reported pre-tax income
Capital expenditures	Approximately €200m	Less than €200m
Restructuring charges & non-recurring items	Approximately €200m	Approximately €250m including €50m of offsetting cash inflows[1]
Net Debt	Net debt zero by year-end 2025 at the latest	Net debt reduction ahead of plan

[1] Offsetting cash inflows include equipment sales, changes in cash collateral, and other items, primarily to be recorded in line item "Asset disposals and other cash items." Continues to exclude the potential positive impact of major asset sales.

Significant Growth Potential in Our New Energies Business

	Geothermal	Carbon Capture, Utilization and Storage ("CCUS")	Hydrogen
Primary Tubes Application	Casing for geothermal wells	Casing and tubing for CO_2 injection wells; transportation line pipes	H_2 storage systems; transportation line pipes
Key Product Needs	Heat resistance; connection integrity during thermal expansion	Corrosion resistance; excellent toughness at low temperatures, long-term well integrity	Extremely tight connections; advanced metallurgy to resist hydrogen embrittlement
Vallourec Positioning	Tubes and connections validated and in use in geothermal wells	Tubes and connections validated and in use in CO_2 injection wells	Tubes and connections validated and in use in H_2 storage wells; storage POC complete
Product Illustration			
Target: New Energies to comprise 10-15% of Group EBITDA by 2030

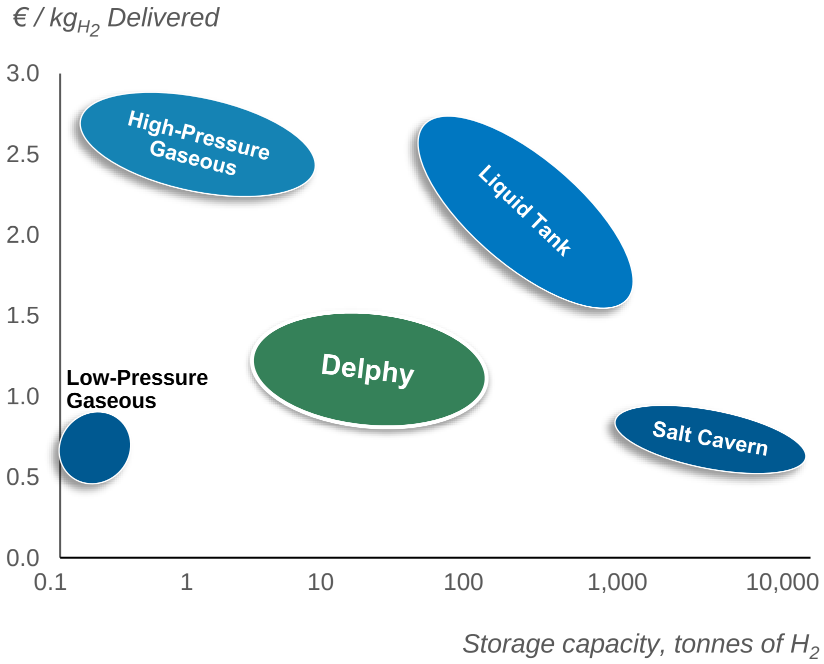
Delphy Vertical H_2 Storage: Superior Intermediate Scale Solution

Competition has higher costs or other drawbacks

Solution	Capex	Opex	Other Factors
Low-pressure gaseous	=	−	Not scalable
High-pressure gaseous	+	+	Higher safety risk Not scalable
Liquid tank	−	+	Rapid boil-off High energy cost
Salt cavern	−	−	Multi-year project Large scale only
Delphy	=	−	**Safe, modular and scalable**

− Lower cost = Intermediate cost + Higher cost

Delphy is a superior-cost solution in its target range



Sources: Vallourec / IAC Partners, 2023
Note: Solution cost is a per kg_{H_2} delivered, model includes capex & opex for the H_2 treatment plant & storage but does not include H_2 production cost

Definitions of Non-GAAP Financial Data and Concepts

Adjusted free cash flow is defined as adjusted operating cash flow +/- change in operating working capital and gross capital expenditures. It corresponds to net cash used in operating activities less restructuring and non-recurring items +/- gross capital expenditure.

Adjusted operating cash flow is defined as EBITDA adjusted for non-cash benefits and expenses, financial cash out and tax payments.

Asset disposals and other cash items includes cash inflows from asset sales as well as other investing and financing cash flows.

Change in working capital refers to the change in the operating working capital requirement.

Data at constant exchange rates: The data presented "at constant exchange rates" is calculated by eliminating the translation effect into euros for the revenue of the Group's entities whose functional currency is not the euro. The translation effect is eliminated by applying Year N-1 exchange rates to Year N revenue of the contemplated entities.

EBITDA: Earnings Before Interest, Taxes, Depreciation and Amortization is calculated by taking operating income (loss) before depreciation and amortization, and excluding certain operating revenues and expenses that are unusual in nature or occur rarely, such as:

- impairment of goodwill and non-current assets as determined within the scope of impairment tests carried out in accordance with IAS 36;
- significant restructuring expenses, particularly resulting from headcount reorganization measures, in respect of major events or decisions;
- capital gains or losses on disposals;
- income and expenses resulting from major litigation, significant roll-outs or capital transactions (e.g., costs of integrating a new activity).

Financial cash out includes interest payments on financial and lease debt, interest income and other financial costs.

Definitions of Non-GAAP Financial Data and Concepts

Free cash flow, as previously defined, may continue to be derived as follows: total cash generation - asset disposals & other cash items. This is also defined as EBITDA adjusted for changes in provisions, less interest and tax payments, changes in working capital, less gross capital expenditures, and less restructuring/other cash outflows.

Gross capital expenditure: gross capital expenditure is defined as the sum of cash outflows for acquisitions of property, plant and equipment and intangible assets and cash outflows for acquisitions of biological assets.

(Increase) decrease in net debt (alternatively, “change in net debt”) is defined as total cash generation +/- non-cash adjustments to net debt.

Industrial margin: The industrial margin is defined as the difference between revenue and cost of sales (i.e. after allocation of industrial variable costs and industrial fixed costs), before depreciation.

Lease debt is defined as the present value of unavoidable future lease payments.

Midcycle or normalized earnings and cash flow simulations and related assumptions do NOT represent guidance, a forecast, a target or an outlook of Vallourec for any particular financial year, but aim to represent an abstract average across cycles and across different circumstances to illustrate, in a volatile and unpredictable environment, the theoretical functioning of the New Vallourec. Conceptually these should be understood as approximate levels to be observed on average, over a long period of time and through various economic and commodity price environments.

Net debt: Consolidated net debt (or “net financial debt”) is defined as bank loans and other borrowings plus overdrafts and other short-term borrowings minus cash and cash equivalents plus the fair value of the cross-currency swaps related to the EUR/USD hedging of the principal of the $820 million 7.5% senior notes. Net debt excludes lease debt.

Definitions of Non-GAAP Financial Data and Concepts

Net working capital requirement is defined as working capital requirement net of provisions for inventories and trade receivables; net working capital requirement days are computed on an annualized quarterly sales basis.

Non-cash adjustments to net debt includes non-cash foreign exchange impacts on debt balances, IFRS-defined fair value adjustments on debt balances, and other non-cash items.

Non-cash items in EBITDA includes provisions and other non-cash items in EBITDA.

Operating working capital requirement includes working capital requirement as well as other receivables and payables.

Restructuring charges and non-recurring items consists primarily of the cash costs of executing the New Vallourec plan, including severance costs and other facility closure costs.

Total cash generation is defined as adjusted free cash flow +/- restructuring charges and non-recurring items and asset disposals & other cash items. It corresponds to net cash used in operating activities +/- gross capital expenditure and asset disposals & other cash items.

Working capital requirement is defined as trade receivables plus inventories minus trade payables (excluding provisions).
